

Faye Priddy's Career timeline at HEFT Imaging Directorate 2004 to present day.

2004

I started my role as a trainee assistant practitioner, a 2 year work based training course with one day per week to attend university.

2010

I was seconded onto the final two years of the BSc Hons course to complete the diagnostic radiography degree. I was a full time student but maintained my job as an assistant practitioner when I was not at university.

2014

I gained knowledge and skills over 18 months as a radiographer was successful in gaining a senior position within the radiology department, moving up to band 6.

2008

I gained a foundation degree and qualified as an assistant practitioner and started a full time job in Radiology, rotating between Heartlands and Solihull Hospital.

2012

I gained my degree in Diagnostic Radiography and was successful in gaining a post at Heartlands Hospital as a band 5 radiographer.

2015

I was successful in gaining a cross sectional radiographer post in CT and MRI, rotating between Heartlands and Solihull hospitals. I started this post in January 2016.
